FATEMEH SHARIF

Tehran, Iran | (+98) 935-222-9425 | Hadis.sharif@gmail.com | www.linkedin.com/in/hadis-sharif-83a64a36/

REACT NATIVE DEVELOPER

PROFESSIONAL SUMMARY

Analytical and results-oriented professional with proven expertise in mobile and web app development, understanding project requirements, and ensuring client satisfaction. Track record of participating in architectural design sessions, providing immediate estimates and completing projects before promised timeframes. Adept at formulating efficient solutions to address and remove bugs, creating applications from planning to launch. Aptitude for developing UI and various other components, including tabs and pages while exceeding project specifications.

React Native Development |Mobile Application Development | Project Execution | Strategic Planning | Agile Methodologies | Android Programming | Test Automation | Data Structure | Research & Analysis

KEY ACCOMPLISHMENTS

- Leveraged React-Redux, React Hooks, Google sign-in, Realm, and MongoDB to execute project **Colorify Notes App** – a Google account compatible notepad to sign-in, save files offline, and sync data with multiple colorful theme options.
- Enhanced personal acumen regarding Express and Node.js and developed back-end server codes for Colorify Notes App.

PROFESSIONAL EXPERIENCE & ACHIEVEMENTS

DATXSOFT – Tehran, Iran
React Native Developer • July 2019– Present

- Utilized Jira and Scrum as well as orchestrated creation and launch of the mobile app as a web application (PWA).
- Developed and incorporated innovative UI and features from conception to completion, establishing and launching React Native App within a four-month timeframe.
- Ensured compliance of code changes to exceed established specifications and requirements through planning and testing while maintaining, optimizing, improving, and troubleshooting projects.
- Boosted average mobile app rating by 30% and attended meetings with CEO to report progress and discuss future plans.

DATXSOFT – Tehran, Iran
Android Developer • July 2018– June 2019

- Improved pre-developed native Android app and removed bugs/inefficiencies.
- Solicited feedback from end-users to make the existing applications more user-friendly.
- Collaborated with cross-functional teams and tested codes while fixing bugs, improving application efficiency. Identified, evaluated, and implemented new technologies to achieve notable outcomes.
- Fostered coordination with UI and UX Designers as well as software testers to ensure compliance with required specifications and company policies.
